PREFACE

This report supplements [] Yedrovo ICBM Complex, USSR, 1/ prepared in response to CIA Requirement C-DI5-82,972 requesting detailed line drawings, to scale, of elements of the complex. The information contained herein is based on [] photography through [] In- individual reports will be updated periodically to reflect changes observed on subsequent photography.

25X1

25X1

The precision target plots included in this report are mathematically rectified projections of the area. Plots are compiled by utilizing precision mensuration instruments, and image interpretation is performed with the aid of stereoscopic viewing equipment. Identifiable image points are measured and their coordinate values mathematically transformed by computer. This transformation corrects for camera and attitude (pitch, roll, and yaw) induced distortions but does not correct for displacement due to ground relief and object height.

These target plots represent the most accurate data compiled to date, but the user is cautioned to exercise care in scaling distances or determining azimuths from these plots, inasmuch as relief can introduce errors in distance and alignment. The dimensions given in Figure 2 are accurate to within plus or minus 5 feet or 5 percent, whichever is greater; those given in Figure 4 are accurate to within plus or minus [] whichever is greater.

YEDROVO ICBM COMPLEX, USSR

COMPLEX SUPPORT FACILITY

The complex support facility for the Yedrovo ICBM Complex (Figures 1 through 4) is located at the eastern end of the complex at 57-51N 33-41E, on the site of the abandoned Yedrovo Airfield 4.5 nautical miles south-southeast of Yedrovo. It is rail and road served, respectively, from the Bologoye-Novgorod rail line and a highway running southeast from Valday through Yedrovo. The facility consists of a railhead and storage area, a large administration and housing area, and a housing area. It was first observed on photography of

25X1

Many of the facilities present at the airfield during World War II apparently are utilized at the railhead and storage area. The administration and housing area contains many buildings which were in a state of disrepair in [] but have been reconstructed since.
